Washington State University
WEED IDENTIFICATION FORM

Fill out this form and send it with the specimen; a completed copy will be returned. Be sure to keep a pressed specimen for reference.

Weeds are identified by **flowers** and **fruits/seeds**. Leaves, stems, buds, and roots may also aid in identification. Place the weed specimen in a plastic bag along with a **dry** paper towel (don't add water) and seal. To maintain freshness for easier identification, store the weed in a refrigerator until mailing, and mail it on Monday, Tuesday, or Wednesday. Do not send shrubs, trees, or ornamentals. Send the sample to: Brad Gaolach, WSU Cooperative Extension King County, 919 SW Grady Way, Renton, WA 98055

Section to be filled out by sender

Date _____ County _____ Agent (if sent by Cooperative Extension) _____

Person seeking identification _____

Address _____

Where was weed growing (if different than address above)? _____

Site where weed was found

Lawn _____ Roadside _____ Forest/Meadow _____ Crop (name) _____

Garden _____ Pasture _____ Range _____ Other _____
